Converging Clinical and Engineering Research on Neurorehabilitation
Contents

Part I

Neurorobotics and Prosthetics

OS2- Foundations for Rehabilitation Robotics in Clinical Practice .......... 3

Time Course of Recovery during Robotic Neurorehabilitation of the Upper Limb in Sub-acute and Chronic Stroke Patients ................. 5
Roberto Colombo, Irma Sterpi, Carmen Delconte, Alessandra Mazzone, Fabrizio Pisano

The Effect of an Arm Support Device on Recovery of Arm-Hand Function in Sub-acute Stroke: A Randomized Controlled Trial .......... 11
Anke I.R. Kottink, Gerdienke B. Prange, Jaap H. Buurke, Johan S. Rietman

Learning a Locomotor Task: With or without Errors? ....................... 17
Jasmin Schneider, Lukas Jaeger, Christoph Hollnegel, Robert Riener, Laura Marchal-Crespo

Towards an Integrated Approach to Multimodal Assistance of Stroke Patients Based on the Promotion of Intentionality ................. 23
Pietro Morasso

Robotic-Assisted Gait Training in Children with Cerebral Palsy in Clinical Practice ................................................................. 29
Marta Pajaro-Blazquez, Runzun Shetye, Jaime Gallegos-Salazar, Paolo Bonato

OS3- Neuroprosthetics (I) ................................................................. 35

Cortically Controlled Electrical Stimulation for Locomotion of the Spinal Cord Injured ............................................................... 37
Monzurul Alam, Jufang He
Early Detection of Epileptic Seizures in Pigs Based on Vagus Nerve Activity ....................................................... 43
Thomas N. Nielsen, Johannes J. Struijk, Kristian R. Harreby, Cristian Sevcencu

Classification of Simultaneous, Dynamic Motions with Surface EMG . . . 49
Jakob C. Rosenvang, Ronnie W. Horup, Kevin Englehart, Winnie Jensen, Ernest N. Kamavuako

Nonlinear Analysis of Electromyogram Following Neuromuscular Electrical Stimulation-Assisted Gait Training in Stroke Survivors . . . . . . 53
A. Dutta, B. Khattar, A. Banerjee

OS3- Neuroprosthetics (II) .............................................. 59

Advances in the Assessment and Suppression of Pathological Tremor in the Framework of TREMOR Project ........................................ 61
J.A. Gallego, E. Rocon, J.L. Pons

Decoding Grasp Types from the Monkey Motor Cortex and On-Line Control of a Dexterous Artificial Hand . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 67

A Novel Assessment Device to Quantify Vestibular Function .............. 73
L. Bassi Luciani, V. Genovese, V. Monaco, S. Micera

Comparison of Stimulation Selectivity in Monopolar and Bipolar Configuration Using the Transversal Intrafascicular Multichannel Electrode (TIME) - Preliminary Results .................................. 79
Paweł Maciejasz, Jordi Badia, Tim Boretius, Kristian Rauhe Harreby, Winnie Jensen, Thomas Stieglitz, Xavier Navarro, David Guiraud

SS3- Wearable Rehabilitation Robotics .................................. 85

Development of a Exoskeleton for Lower Limb Rehabilitation .......... 87
M. Bortole, J.L. Pons

Analysis of the Forces on the Finger Joints by a Joint-Less Wearable Robotic Hand, SNU Exo-Glove .................................................. 93
HyunKi In, Kyu-Jin Cho

Optimization of Lower Extremity Kinetics during Transfers Using a Wearable, Portable Robotic Lower Extremity Orthosis: A Case Study ................................................................. 99
Joshua G. Vose, Arlene McCarthy, Eduardo Tacdol, Robert W. Horst
Effect of Wearable Robotic Leg Orthosis on the Weight Bearing Symmetry during Sit-to-Stand in Individuals Post-stroke ............ 103
Shilpa Patil, Theresa McGuirk, Carolynn Patten

Effects of ‘Intention-Based’ Robotic Exoskeleton on Muscle Activation Patterns during Overground Walking ........................ 109
Carolynn Patten, Theresa E. McGuirk, Shilpa Patil

SS4- Control Strategies in Rehabilitation Robotics (I) ................ 115

Control Strategies for Robot-Assisted Training - Literature Review and Experimental Impressions ................................. 117
Laura Marchal-Crespo

Adaptive Control in Neurorehabilitation ................................. 123
Alicia Casals

Upper Limb Robot-Assisted Therapy in Chronic and Subacute Stroke Patients: A Kinematic Analysis ................................. 129

Skeletal Muscle Contraction Control and Tracking Using an Adaptive Augmented PI Control Approach ............................ 135
Paola Jaramillo, Adam Shoemaker, Alexander Leonessa

Effect of Gravity Compensation on Upper Limb Muscle Synergies during Reaching: Preliminary Results from Healthy Subjects ......... 141

SS4- Control Strategies in Rehabilitation Robotics (II) ............. 147

Pilot Study on Following and Resisting Forces on the Pelvis ......... 149
Jos H. Meuleman, Reinoud Kruijthof, Edwin H.F. van Asseldonk, Herman van der Kooij

Hybrid FES-Robot Cooperative Control of Ambulatory Gait Rehabilitation Exoskeleton for Spinal Cord Injured Users ............ 155
Antonio J. del-Ama, Juan C. Moreno, Angel Gil-Agudo, Jose L. Pons

Effectiveness of the LOwer Extremity Powered ExoSkeleton (LOPES) Robotic Gait Trainer on Ability and Quality of Walking in SCI Patients ................................................................. 161
Bertine M. Fleerkotte, Jacob H. Buurke, Bram Koopman, Leendert Schaake, Herman van der Kooij, Edwin H.F. van Asseldonk, Johan S. Rietman
Neuromuscular Control of Dynamic Joint Stabilization with a Knee Brace: Implications to Improve Muscle and Balance Control .......... 167
Guillermo Asín, Nuria Bonsfills, Enrique Gómez-Barrena, Almudena Fernández-Bravo, Juan C. Moreno, José L. Pons

Fuzzy Logic Based FES Driven Cycling by Stimulating Single Muscle Group ................................................................. 173
S.C. Abdulla, M.O. Tokhi

SS6- How to Translate FES from the Research to Practice ............ 183

Customizing Functional Electrical Therapy Using a ‘Rehabilitation Problem-Solving Form’ – A Preliminary Study .......................... 185
A. Banerjee, R. Kumar, B. Khattar, R. Reddi, A. Dutta

Does Anode Position and Electrode Impedance Affect Muscle Selectivity in Upper Limb sFES? ................................. 191
Aikaterini D. Koutsou, Eduardo Rocon, José L. Pons

Muscle Activation Pattern and Weight Bearing of Limbs during Wheelchair Transfers in Healthy Individuals – A Step towards Lower Limb FES Assisted Transfer for Paraplegics ................................. 197
Nissan Kunju, George Tharion, Suresh R. Devasahayam, M. Manivannan

Control of Walking in Unilateral Drop Foot Using Artificial Neural Networks and Hybrid LMA-PSO Training Algorithm .......... 203
Neda Kordjazi, Hamid R. Kobravi, Hossein A. Hosseini, Ali Firouzabadi

Assisting Persons after Stroke to Restore Gait: Hybrid System .......... 209
Dejan B. Popović, Aleksandar Veg, Aleksandra Dragin, Ljubica Konstantinović, Nadica Miljković, Milica Djurić Jovičić

P1 - Poster Session ......................................................... 215

Preliminary Results from the Use of the SOFTROBOT Platform in Stroke Patients ................................................................. 217
C. Rodríguez-Guerrero, EFTO Hospital Beata Maria Ana, P. Oliva Navarrete, J.C. Fraile, P. Rivera Farina

Lokomat Training, Cervical versus Thoracic Spinal Cord Injuries: Comparative Study .......................................................... 229
M. Alcobendas-Maestro, A. Esclarín-Ruz, R. Casado-López

Exoskeletal Neuro-Rehabilitation in Chronic Paraplegic Patients – Initial Results ................................................................. 233
Mirko Aach, Renate Meindl, Tomohiro Hayashi, Irene Lange, Jan Geßmann, Andre Sander, Volkmar Nicolas, Peter Schwenkreis, Martin Tegenthoff, Yoshiyuki Sankai, Thomas A. Schildhauer
Customized Robot Aided Gait Training for NeuroRehabilitation 237
Shahid Hussain, Sheng Q. Xie

NASA-TLX Assessment of Modern Close Loop Controllers in Haptic Guidance for Assisted Rehabilitation 243
J.A. Turijan-Rivera, F.A. Machorro-Fernandez, F.J. Ruiz-Sanchez, V. Parra-Vega, O.A. Domínguez-Ramírez

Ursus: A Robotic Assistant for Training of Children with Motor Impairments 249
C. Suárez Mejías, C. Echevarría, P. Nuñez, L. Manso, P. Bustos, S. Leal, C. Parra

Design of a Pediatric Exoskeleton for the Rehabilitation of the Physical Disabilities Caused by Cerebral Palsy 255
Marina Canela, Antonio J. del Ama, José Luis Pons

Augmenting Rehabilitation after Stroke: A Flexible Platform for Combining Multi-channel Biofeedback with FES 259
Subhasis Banerji, John Heng, P.S. Ponvignesh, Daphne D. Menezes

Robotic Design of an Upper Limb Exoskeleton for Motion Analysis and Rehabilitation of Paediatric Neuromuscular Disorders 265
M. Alejandro Lugo-Villeda, Francisco J. Ruiz-Sanchez, Omar A. Domínguez-Ramírez, Vicente Parra-Vega

Multimodal Robotic Device to Assistive and Rehabilitation Tasks 271
Francisco J. Badesa, Ricardo Morales, Nicolas Garcia-Aracil, José María Sabater, Eugenia Papeleo, Loredana Zollo, Eugenio Guglielmelli

Switching between the Modes of Control: Implications for the Closed Loop Control of Prostheses 277
Marko Markovic, Strahinja Dosen, Dario Farina

Functional Electrical Stimulation Controller Based on Muscle Synergies 283
W. Denis, F. Brunetti, S. Piazza, D. Torricelli, J.L. Pons

Body Mass Index as a Parameter in a Motor Adaptation Process 289
Svetlana Grosu, Kristel Knaepen, Eva De Becker, Michael Van Damme, Bram Vanderborght, Romain Meeusen, Dirk Lefeber
Neurosignals Modeling and Processing

OS5- Biofeedback in Neurorehabilitation ............................................. 297

A Rehabilitation System for Training Based on Visual Feedback Distortion ................................................................. 299
Patrick Weiss, M. Heldmann, T. Münte, A. Schweikard, E. Maehle

On Feasibility of Gaze and Facial Component Tracking during Robot Assisted Walking .................................................. 305
Simon Zelič, Aleš Holobar, Matjaž Divjak

Motor Learning in Children with Cerebral Palsy with Feedback of Principal Component Space of Reduced Dimension ...................... 311
Citlali Lopez-Ortiz, Julia M. Simkowski, Wendolyn Gomez, Nikolay S. Stoykov, Deborah J. Geabler Spira

A Comparison between Influence of Visual and Haptic Feedback on Jerk Indicators in Hand Exercises ........................................... 317
Baldassarre D’Elia, Maurizio Schmid, Ivan Bernabucci, Michela Goffredo, Tommaso D’Alessio

Development of an Experimental Set-Up for Providing Lower-Limb Amputees with an Augmenting Feedback ............................ 321
Simona Crea, Nicola Vitiello, Stefano Marco Maria De Rossi, Tommaso Lenzi, Marco Donati, Christian Cipriani, Maria Chiara Carrozza

OS6- Neuromotor Models ................................................................. 327

Knee Muscle Fatigue Estimation during Isometric Artificially Elicited Contractions in Incomplete Spinal Cord Injured Subjects .............. 329
Antonio J. del-Ama, Elisabeth Bravo-Esteban, Juan C. Moreno, Julio Gómez-Soriano, Steffano Piazza, Aikaterini D. Koutsou, Ángel Gil-Agudo, José L. Pons

Animal Model to Investigate the Role of the Motor Cortex during Treadmill Locomotion in Rats .................................................. 335
J.S. Routhe, M.J. Niemeier, H.C. Riis, G. Schneider, W. Jensen

Modeling Fatigue Effect in an EMG-Driven Hill Type Muscle Model during Dynamic Contractions .............................................. 341
Diana.R. Bueno, L. Montano

Inverse Estimation of Multiple Muscle Activations under Isokinetic Condition .......................................................... 347
Zhan Li, Mitsuhiro Hayashibe, David Guiraud
OS8- Translational Neurorehabilitation ................................................. 353

Interdisciplinary Development of Intelligent Rehabilitation Technologies .................................................. 355
Jennifer Boger, Rosalie H. Wang, Babak Taati

Medical and Clinical Engineering Committee ................................................................. 361
Antonio J. del-Ama, Susana Borromeo

Selection of Optimal Candidate for Patients with Stroke Involved in the Robotic Therapy for Walking Recovery: Characterization of Clinical and Psychological Features ........................................ 365
Giovanni Morone, Marco Iosa, Augusto Fusco, Maura Bragoni, Domenico De Angelis, Marco Broccoli, Vincenzo Venturiero, Paola Coiro, Luca Pratesi, Stefano Paolucci

SS8- Sensory Restoration .......................................................... 369

Influence of Myofascial Therapy Applied to the Cervical Region of Patients Suffering from Unilateral Spatial Neglect and Head Deviation with Respect to the Median Line .................................................. 371
A. Vaquero Rodríguez

Perception of Animated Spectrogram of Speech, a Multi-word Test ................................ 375
Somayeh Bazin, Ali Asghar Soltani Farani

Objective Assessment of a New Olfactory Rehabilitation Approach in Adults with Olfactory Impairments Using Functional Magnetic Resonance (fMRI) ................................................................. 381
Susana Borromeo, Cristina Gomez-Calero, Elena Molina, Javier Fernández-Huete, Nieves Martínez-Monge, Adolfo Toledano Muñoz, Guillermo Luna, Juan Antonio Hernández-Tamames

The HyVE: Hybrid Vibro-Electrotactile Stimulation for Sensory Feedback in Upper Limb Prostheses ................................................................. 385
Marco D’Alonzo, Strahinja Dosen, Christian Cipriani, Dario Farina

Designing Sensory Neural Prostheses - Lessons to Learn from Auditory Brainstem Implants ................................................................. 391
Steffen K. Rosahl, Christos Pantazis, Sybille Rosahl

Visual Neuroprosthesis: The Relevance of Plasticity .................................................. 397
A. Alfaro, E. Fernández
In vitro Large Polyfascicular Nerve Model for Assessment of Fascicular Recruitment Characteristics of Peripheral Nerve Interfaces .................................................... 403
Kristian R. Harreby, Cristian Sevcencu, Winnie Jensen

A Motion Library for Robot-Based Upper Limb Rehabilitation .......... 409
F. Domrös, D. Störkle, J. Ilmberger, B. Kuhlenkötter

Decoding Upper Limb Movement Velocity for Stroke Rehabilitation .... 415
Enrique Hortal, Eduardo Iáñez, Andrés Úbeda, Daniel Tornero, José M. Azorín

Chronic Electrochemical Investigation of Titanium Nitride Stimulation Electrodes in vivo .......................................................... 421
Suzan Meijs, Morten Fjorback, Nico J.M. Rijkhoff

Hybrid Neuromusculoskeletal Modeling ........................................ 427
Massimo Sartori, Dario Farina, David G. Lloyd

Protocol and System for Spastic Behavior Simulation through the Generation of Cutaneous Reflexes ............................................... 431
F. Resquín, E. Bravo, J. Gómez-Soriano, F. Brunetti, J.L. Pons

Towards Improving the Usability of Electromyographic Interfaces ..... 437
Hugo Silva, Reinhold Scherer, Joana Sousa, Ana Londral

Preliminary Result from a Multimodal Interface for Cerebral Palsy Users Based on Eye Tracking and Inertial Technology ................. 443
A. Clemotte, R. Raya, R. Ceres, E. Rocon

Simulation of the Muscle Recruitment by Transcutaneous Electrical Stimulation in a Simplified Semitendinosus Muscle Model .......... 449
Jose D. Gomez-Tames, Jose Gonzalez, Shuto Nakamura, Wenwei Yu, Member, IEEE

Ultrasound Imaging and Analysis of Muscle Activity in Lower Limb ... 455
Shuto Nakamura, Jose D. Gomez-Tames, Jose Gonzalez, Sho Ojima, Tadashi Yamaguchi, Wenwei Yu

Evaluation of IMU ZigBee Sensors for Upper Limb Rehabilitation ..... 461
Carlos A. Cifuentes, Ariel Braidot, Melisa Frisoli, Alfonso Santiago, Anselmo Frizera, Juan Moreno

Postural Synergies and Neural Network for Autonomous Grasping:
A Tool for Dextrous Prosthetic and Robotic Hands .......................... 467
Fanny Ficuciello, Gianluca Palli, Claudio Melchiorri, Bruno Siciliano
MAXSENS: A Flexible Matrix Electrode for Sensory Substitution ........................................ 481
Lana Popović-Maneski, Strahinja Došen, Goran Bijelić

Brain-Neural Interfaces

OS1- BCI for Neurorehabilitation ......................................................................................... 489

Error Potential Detection to Assist Movement Intention Decoding in Stroke Patients ......................................................... 491
Joaquín López, Andrés Úbeda, Eduardo Iáñez, José M. Climent, José M. Azorín

EMG Topography of Low Back Muscles as a Tool for Posture Evaluation and for the Assessment of Lumbalgia Treatments Progress ........................................................................................................ 495
Nadica Miljkovic, Haritz Zabaleta, Cristina Rodriguez-de-Pablo, Thierry Keller, Gonzalo A. Garcia

Randomized Controlled Trial to Evaluate a BCI-Supported Task-Specific Training for Hand Motor Recovery after Stroke ......................................................... 501
Floriana Pichiorri, Giovanni Morone, Iolanda Pisotta, Marco Secci, Febo Cincotti, Stefano Paolucci, Marco Molinari, Donatella Mattia

Classification of Stance and Swing Gait States during Treadmill Walking from Non-invasive Scalp Electroencephalographic (EEG) Signals ........................................................................................................ 507
Fernando San Martín Jorquera, Sara Grassi, Pierre-André Farine, José Luis Contreras-Vidal

Motor Imagery Driven BCI with Cue-Based Selection of FES Induced Grasps ........................................................................................................ 513
Andrej M. Savić, Nebojša B. Malešević, Mirjana B. Popović

OS9- Neuromodulation ......................................................................................................... 517

Improved Gait Symmetry in Hemiparetic Patients Following Gait Rehabilitation Supported by Activation of the Nociceptive Withdrawal Reflex ........................................................................................................ 519
Erika G. Spaich, Niels Svaneborg, Ole K. Andersen

“Awake Surgery” of Slow-Growing Tumors and Cortical Excitability Measured by EEG Recordings: Preliminary Results ................................................................. 525
F. Bonnetblanc, G. Herbet, P. Charras, M. Hayashibe, D. Guiraud, H. Duffau, B. Poulin-Charronnat
Virtual Cerebellar Lesions Influence Verbal Working Memory a tDCS Study ............................................................. 529
Katja Macher, Andreas Böhringer, Jürgen Dukart, Arno Villringer,
Burkhard Pleger

A Simulation Study to Characterize the Effects of Frequency Modulation during Epidural Electrical Stimulation ............ 533
Marco Cempini, Gunter Kanitz, Marco Capogrosso, Stanisa Raspopovic,
Silvestro Micera

Tremor Suppression Using Electromyography and Surface Sensory Electrical Stimulation ........................................... 539
Strahinja Dosen, Jakob L. Dideriksen, Eduardo Rocon, Jose L. Pons,
Dario Farina

OS10- Assessment of Motor Status ........................................... 545

Effects of Bimanual Motor Learning on Unimanual Performance ...... 547
Matic Trlep, Matjaž Mihelj, Marko Munih

On Repeatability of Motor Unit Characterization in Pathological Tremor ................................................................. 553
Petra Povalej Bržan, Juan Álvaro Gallego, Dario Farina, Aleš Holobar

Fast Forms of Central Fatigue Account for Decreases in Rate of Execution during Fast and Short Repetitive Motor Tasks ............ 557
Pablo Arias, Verónica Robles-García, Yoanna Corral-Bergantiños,
Nelson Espinosa, Kenneth L. Grieve, Casto Rivadulla, Antonio Oliviero,
Javier Cudeiro

Intersegmental Synchronization of Spontaneous Cord Dorsum Potentials as a Clinical Parameter to Evaluate Changes in Neuronal Connectivity Produced by Peripheral Nerve and Spinal Cord Damage ................................................................. 563
Mario Martin, Diógenes Chávez, Javier Béjar, Gennaro Esposito,
Érika Rodríguez, Ulises Cortés, Pablo Rudomín

Analysis of EEG Signal to Detect Motor Command Generation towards Stroke Rehabilitation ............................................. 569
Yoshikatsu Hayashi, Kiyoshi Nagai, Koji Ito, Slawomir J. Nasuto,
Rui C.V. Loureiro, William S. Harwin

SS2- Systematic Rehabilitation Based on Brain Rhythm, Muscle Synergies and Tacit Learning .............................................. 575

Voluntary and Reflex Muscle Synergies in Upper Limbs .................. 577
Tytus Wojtara, Fady Alnajjar, Shingo Shimoda, Hidenori Kimura
The Rule of the Dependency Level of the Sensory Synergy in Recruiting Muscle Synergy
Fady Alnajjar, Tytus Wojtara, Shingo Shimoda, Hidenori Kimura

583

Manipulative Evaluation of Alpha Bottom-Up Networks in the Resting-State by Combined TMS-EEG
Masahiro Kawasaki, Yuji Mizuno, Keiichi Kitajo

589

Trajectory Optimization by Tacit Learning
Shingo Shimoda, Hidenori Kimura

593

Changes in Corticospinal Excitability Following the Use of a BCI Based Protocol Combined with Sham Visual Feedback
Signe R. Kristensen, Imran K. Niazi, Mads Jochumsen, Ning Jiang, Dario Farina, Natalie Mrachacz-Kersting

599

EEG-Eye Blink Detection System for Brain Computer Interface
S. Rihana Member, IEEE-EMBS (Author), P. Damien, T. Moujaess

605

Neurorehabilitation in Chronic Paraplegic Patients with the HAL® Exoskeleton – Preliminary Electrophysiological and fMRI Data of a Pilot Study
Matthias Sczesny-Kaiser, Oliver Höffken, Silke Lissek, Melanie Lenz, Lara Schlaffke, Volkmar Nicolas, Renate Meindl, Mirko Aach, Yoshiyuki Sankai, Thomas A. Schildhauer, Martin Tegenthoff, Peter Schwenkreis

611

Investigating the Neural Basis of Brain-Computer Interface (BCI)-Based Stroke Rehabilitation
Timm Meyer, Jan Peters, Thorsten O. Zander, Doris Brötz, Surjo R. Soekadar, Bernhard Schölkopf, Moritz Grosse-Wentrup

617

A Workstation for Development of Brain Machine Interfaces Using Spiking Neural Networks
Mehmet Kocaturk, H. Ozcan Gulcur, Resit Canbeyli

623

Asynchronous BCIs for the Early Detection and Classification of Voluntary Movements: Applications in Stroke Rehabilitation
J. Ibáñez, J.I. Serrano, M.D. del Castillo

629

Individual Evaluation of Interhemispheric Neural Synchrony Mediating Perceptual Bias in Apparent Motion Perception – A TMS-EEG Study and Applications in Rehabilitation
Yuji Mizuno, Masahiro Kawasaki, Keiichi Kitajo

635
